I declare, I confirm, I certify and I sign that I received substantial, important, line by line peer review with several and substantial comments, important remarks and hints from, at least, 3 Reviewers and the Assistant Editor for my paper: **Analysis of The Influence of Entrepreneurship Capability, Agility, Business Transformation, Opportunity on Start-Up Behavior In E-Commerce Companies In Indonesia During The Covid 19 Pandemic** with Authors: **CHRISTOPHER ALLEN PRAMONO, ADLER HAYMANS MANURUNG, PANTRI HERIYATI, WIBOWO KOSASIH**
I would like to thank all the reviewers for their thoughtful comments and efforts towards improving our manuscript. We revised the manuscript with special attention to the comments that we received from**Three (3)**.....

Reviewer 1 : In introduction the authors can highlight the usefulness of the study in the practical applicability, The Table 3 (Hypothesis Test) must be presented better and more details must be incorporated inside the text. This table isn't aligned with the right margin, The paper should be reviewed by native English reviewers who will advise the authors about misprints and better sentence construction, I think that the Section 3 'Methodology' should be presented with more details and More representative keyword should be added: we have added the practical use of this research in the introduction, we have also explained further about the discussion in table 3, we have also checked our paper again regarding the language structure, we have also detailed the discussion in the methodology and we have also added keywords that corresponding

Reviewer 2 : The reason(s) for writing the paper or the aims of the research should be clearly given in the abstract, The statistical analysis in section 4 should be extended, There are two sections that are numbered as '2' ('Problem Formulation' and 'Literature Review'). The authors should fix it, Please, add this reference: : we have added our writing objectives and research methods in the abstract section, in chapter 4 we have added the Fornell Larcker Criterion analysis, and explained the hypothesis section, we have also added citations from the journal Antoine Trad, The Business Transformation and Enterprise Architecture Framework the Applied Holistic Mathematical Model's Persistence Concept (AHMMPC), WSEAS Transactions on Computers

Reviewer 3: The description of the problem and the methodology are not clearly written in the abstract and the introduction, Section '4.4-Hypothesis Test' should be rewritten because it is

incomprehensible, In conclusions section the authors should explain the contribution of their study and the obtained conclusions to the start-up industry. More conclusions would be welcome, The comment regarding "This finding explains that in building a start-up, the agility entrepreneurship capability factor must be possessed by the founder while still following business transformation and opportunities in developing the business." should be better explained : we have added about our research method in the abstract section, we have also rewritten the writing method in section 4.4. We have also added research contributions in the conclusion section
