In case of violation of the above terms, WSEAS can reject any unpublished paper or even retract any published paper.**

*All authors thank the editorial team for the scientific evaluation of our work. I personally thank them additionally because in the name of engineering approved this ambitious research work to find an alternative implementation route, on the opposite site of complex patenting bureaucracy. Our primary intent was to present banking system security issues indicatively and epidermically but the magazine persuaded us for a more detailed view. I thank once more, the respectable editorial team*
