I have been seeking high-quality academic journals and found that WSEAS is renowned for its high standards and international recognition. This is my second publication with WSEAS, and once again, I have received invaluable guidance from three expert reviewers. Their constructive feedback, insightful suggestions, and thoughtful recommendations have significantly enhanced the quality of my research, offering valuable insights to those interested in industrial business models, particularly in managing natural disasters to ensure business continuity.

The study, "The Confirmatory Model Analysis of Business Management in the Industrial Sector to Manage Natural Disaster Situations," presents a comprehensive framework for organizational development, risk management enhancement, and business recovery in the industrial sector. It emphasizes the application of a model designed for the effective management of natural disasters. In particular, the research focuses on ISO-certified industrial enterprises in Thailand, aiming to establish practical guidelines for ensuring business continuity.

I sincerely hope that this research will make a meaningful contribution to both academic studies and practical business applications. I also look forward to submitting additional academic work for publication in WSEAS in the future.
