Dear WSEAS,

I recently submitted papers to WSEAS, a well-established and reputable publisher. Founded in 1996, WSEAS has 29 years of experience in scientific and technical publishing, producing high-quality, peer-reviewed journals and books in both electronic and print formats. WSEAS serves researchers, engineers, scientists, graduate students, and industry professionals by keeping them informed of the latest developments in their respective fields.

I want to emphasize that WSEAS has no connection to dubious publishers that engage in fake peer review or predatory practices. I can confidently state that WSEAS operates with integrity and adheres to ethical publishing standards. I have never submitted my work to predatory publishers, nor have I engaged in any predatory publishing practices.

I take pride in having my research published with WSEAS, knowing that they uphold high academic standards. The WSEAS team also expresses deep gratitude to all researchers who contribute to their publications and remains committed to working even harder to support scientific progress in the years to come.

I encourage my colleagues to remain vigilant and to avoid predatory publishers that undermine the credibility of scholarly work. WSEAS continues to be a trusted platform for disseminating valuable research, and I fully support their mission to advance science with integrity.

Best regards,

Payal Pramanik
