I declare, I confirm, I certify and I sign that I received substantial, important, line by line peer review with several and substantial comments, important remarks and hints from, at least, 3 Reviewers and the Assistant Editor for my paper: Padé Approximants via Matrix Elementary Row Operations: Algorithm, Error Bounds, and Optimality
with Authors: Wannatida Yonwilad, Ekkawit Lampai
I would like to thank all the reviewers for their thoughtful comments and efforts towards improving our manuscript. We revised the manuscript with special attention to the comments that we received from **Three (3)** reviewers that were experts, specialists in the area of my paper.
I declare, confirm, certify and sign that WSEAS has checked my paper for possible plagiarism by Turnitin and my paper was found without plagiarism or self-plagiarism by Turnitin. I also declare, confirm, certify and sign that also that no Associate-Editor, no Editor-in-Chief, no member of the WSEAS Secretariat forced me in this Journal to add references (citations) to any previous publications of the journal.

I also declare, confirm, certify and sign that I have made all the changes, modifications, additions, studies, corrections asked by the reviewers and I have fully complied with their instructions. I also understand that before the publication the 3 (or more than 3) reviewers will check my paper to see if all the changes, modifications, additions, studies, corrections etc have been done and I authorize the WSEAS to publish my paper or to reject my paper even in the 2nd round of peer review or to continue with an additional round of peer review.

**I also declare, I confirm, I certify and I sign that I will not publish this paper or an important part of the paper in any other Journal (inside or outside WSEAS) Conference Proceedings (inside or outside WSEAS), Book (inside or outside WSEAS), University Repository etc) without the written permission of the WSEAS.**
**I also declare, I confirm, I certify and I sign that this paper or an important part of the paper has not been published other Journal (inside or outside**

**WSEAS) Conference Proceedings (inside or outside WSEAS), Book (inside or outside WSEAS), University Repository etc). In case of violation of the above terms, WSEAS can reject any unpublished paper or even retract any published paper.**

Please, write additional comments below (take ideas from: http://wseas.org/main/author-testimonials.html )

I am grateful to the three reviewers and to the Assistant Editor for an exceptionally thorough, line-by-line evaluation. The reports were specific, technically substantial and demanding, and each of them changed the paper for the better.

Following the reviewers' guidance we expanded the theoretical analysis considerably. Every result now carries a complete, self-contained proof, and four new results were added: a numerical stability analysis of the algorithm with supporting computations, a transfer lemma establishing where the Padé table of the exponential learning function is nondegenerate, an exact shape analysis of the Padé learning curve, and an error-propagation bound for the application. The comparison with Taylor approximation is now built on an exact integral identity with sharp large-argument asymptotics.

We also set out explicitly which results are inherited from our companion paper and which are new, item by item, as Reviewer 3 requested, and we related the work to control theory and dynamical systems as Reviewer 2 suggested. Every entry of the reference list was checked against the publisher record, so that each citation corresponds to a real publication and each DOI resolves to it.

This was a demanding review, conducted by referees who were clearly specialists in the area, and the revised paper is substantially stronger for it.
